Baby T

For coffee specialists seeking the performance of a professional espresso machine for their home.

Experience professional performance at home

The Baby T is designed for home baristas who value every detail in the art of coffee preparation. Drawing directly from the professional Barista T, it features an adjustable rotary pump and exceptional thermal stability of $\pm 0.5^{\circ}\text{C}$, ensuring precise and consistent results. Its robust, modern industrial design makes it both a stylish and reliable choice, while the combination of a high-performance thermoblock with an independent steam boiler offers up to 50% energy savings compared to traditional espresso machines.

Highlights

THERMOBLOCK

Independent, insulated professional coffee group

PID CONTROL

Thermal stability of $\pm 0,5^{\circ}\text{C}$ with PID temperature control and dynamic pre-heating

DIGITAL CONTROL

Two digital multifunction displays with shot-timer

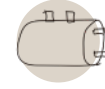

EXTRACTION CONTROLS

Precise volumetric control and programmable preinfusion

PUMP

Rotary pump with adjustable pump pressure

STEAM BOILER

2,5-liter independent insulated stainless-steel steam boiler

HIGH-QUALITY

Stainless steel materials, accessories and components

APP

App control

DESIGN

Modern and industrial design
